Motivating example

Motivating example

...

Ontologies are intellectual works
They can be protected by copyright

RDF Datasets can be considered as databases,
also legally protected in the EU

Linked Data resources can be works protected by copyright

as long as they are:

- **original** mind creations
- in a **tangible** medium
- **attributable to a person** or collective

Databases are also protected in some legal systems (Europe) as long as certain requirements are met

Some RDF Datasets contain personal data

No personal data file can be kept without the data subjects' consent, a definite purpose, a limitation in time and proper security measures to grant the data subjects' rights. Demands from the data subject must be attended

Privacy vs. Data Protection

Rights of the individuals

- | to fairness when giving information

- | Obtained by fair methods, informed (with contact of the organization) with a consent with a definite purpose and for a limited time. No consent is needed by legal obligation, contract with individual, necessary to protect vital interests etc.

- | to get a copy of their personal information

- | includes both computer and certain manual files

- | obligation to take appropriate security measures

- | to have wrong information corrected

- | to opt out of marketing - includes mail & phone

- | to complain to the Data Commissioner

- | to freedom from automated decision making

Objectives of Data Protection Legislation

Promoting the free
flow of information

Protection of
privacy as a
human right

To enter into force very soon:

EU Regulation on the protection of natural persons with regard to the processing of personal data and on the free movement of such data

Consuming and publishing Linked Data can be limited by a number of laws, like personal or confidential information. Access and communication can be limited.

Copyright Directive	Directive 2001/29/EC on the harmonisation of certain aspects of copyright and related rights in the information society
Computer Programs Directive	Directive 2009/24/EC on the legal protection of computer programs
Database Directive	Directive 1996/9/EC on the legal protection of databases
Convention 108	Convention for the Protection of Individuals with regard to Automatic Processing of Personal Data, CETS No.108, 28/01/1981
Data Protection Directive	Directive 1995/46/EC on the protection of individuals with regard to the processing of personal data and on the free movement of such data
General Data Protection Regulation	Regulation on the protection of natural persons with regard to the processing of personal data and on the free movement of such data
Proposal for Police and Criminal Justice Data Protection Directive	Directive on the protection of individuals with regard to the processing of personal data by competent authorities for the purposes of prevention, investigation, detection or prosecution of criminal offences or the execution of criminal penalties, and the free movement of such data and repealing
Public Sector Information Directive	Directive 2003/98/EC on the re-use of public sector information
Conditional Access Directive	Directive 98/84/EC on the legal protection of services based on, or consisting of, conditional access

V. Rodríguez-Doncel, C. Santos, P. Casanovas, A. Gómez-Pérez. **Legal Aspects of Linked Data**, Computer Law & Security Review, ISSN: 0267-3649, Springer. (to appear)

Examples of actions that are limited

- | Copy and distribute physical copies of an ontology
- | Publish an ontology or dataset in a server
- | Integrate the ontology in a local computer to power an application
- | Translate (and publish) a dataset
- | Copy a database to a local server to power an application (Europe)
- | Integrating and editing a database to build another one (Europe)
- | Storing a dataset with personal data in a non-secured computer

It is not always possible to use
and publish other's data

Legal measures

Technical measures

How to protect your valuable data

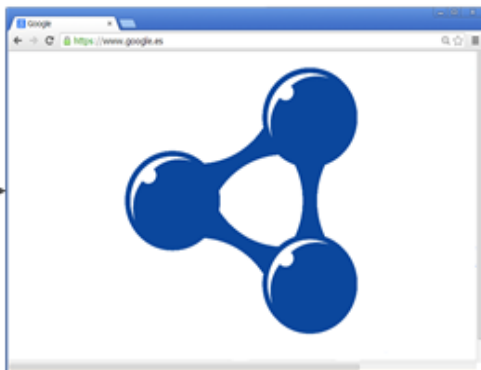

Legal measures: register and license

- | Licenses for **general works** (e.g. Creative Commons)
- | Licenses for **documentation** (e.g. GNU Free Documentation License)
- | Licenses for **software** (e.g. Apache)
- | Licenses for **data** (e.g. Open Data Commons)

Technological protection measures:

- | Code obfuscation
- | Expiration date encoded.
- | Hardware dongle required.
- | Copy-protection schemes.
- | “Activation” features.
- | Encryption schemes; digital-rights management (DRM)
- | **Access control**

How to protect your valuable data

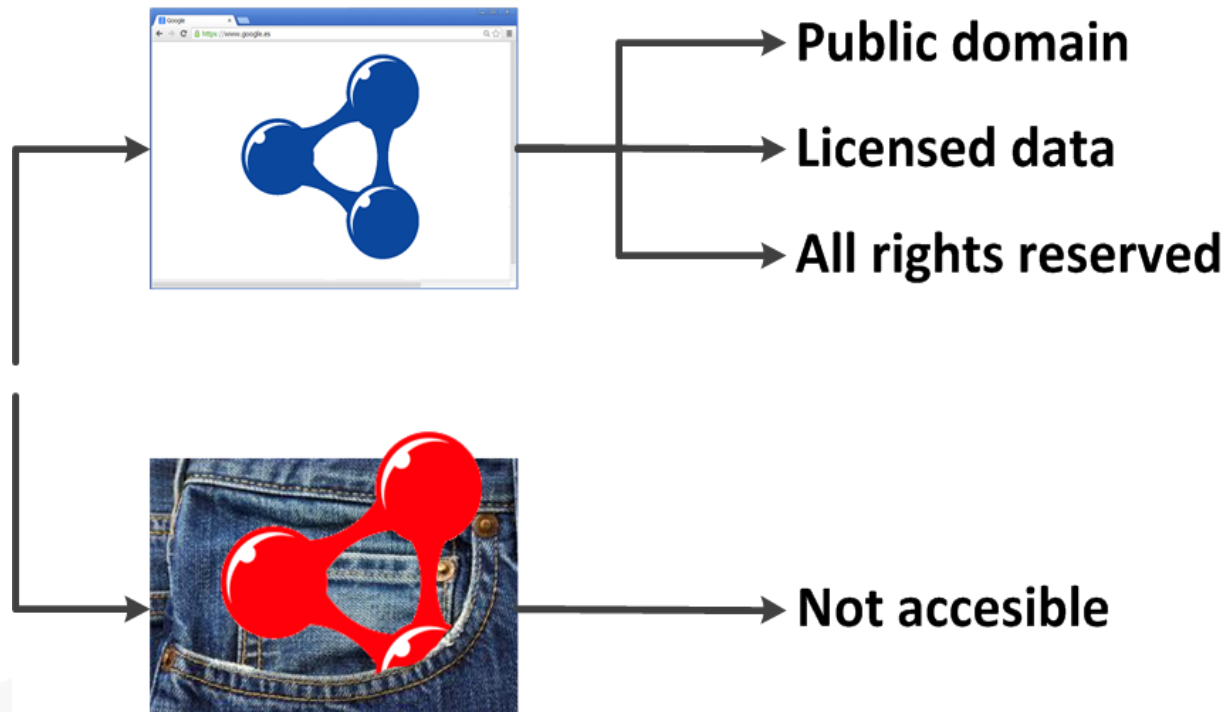

Licenses
Publishing licensed Linked Data
Licenses grant the right to execute certain actions subject to certain conditions

Policies
Conditional access to Linked Data
Linked Data can be conditionally served based on policies

Kind of licensed works

Linked Open Data and Linked Data

Dataset level

Triple level

Mappings level

Legal measures: declaring license within the data items

<http://sws.geonames.org/3996063/about.rdf>

```
<gn:alternateName xml:lang="zh">墨西哥</gn:alternateName>
<gn:featureClass rdf:resource="http://www.geonames.org/ontology#A"/>
<gn:countryCode>MX</gn:countryCode>
<gn:population>112468855</gn:population>
<wgs84_pos:lat>23</wgs84_pos:lat>
<wgs84_pos:long>-102</wgs84_pos:long>

  <cc:attributionURL rdf:resource="http://sws.geonames.org/3996063/" />
  <cc:attributionName rdf:datatype="http://www.w3.org/2001/XMLSchema#string">GeoNames</cc:attributionName>
  <dcterms:created rdf:datatype="http://www.w3.org/2001/XMLSchema#date">2006-01-15</dcterms:created>
  <dcterms:modified rdf:datatype="http://www.w3.org/2001/XMLSchema#date">2014-10-17</dcterms:modified>
</foaf:Document>
</rdf:RDF>
```

Legal measures: declaring the license in the dataset metadata

BRITISH
LIBRARY

The British National Bibliography (BNB) lists the books and new journal titles published or distributed in the United Kingdom and Ireland since 1950.

```
<http://bnb.data.bl.uk/id/data/BNB> a void:Dataset ;  
    dct:license <http://creativecommons.org/publicdomain/zero/1.0> ;
```

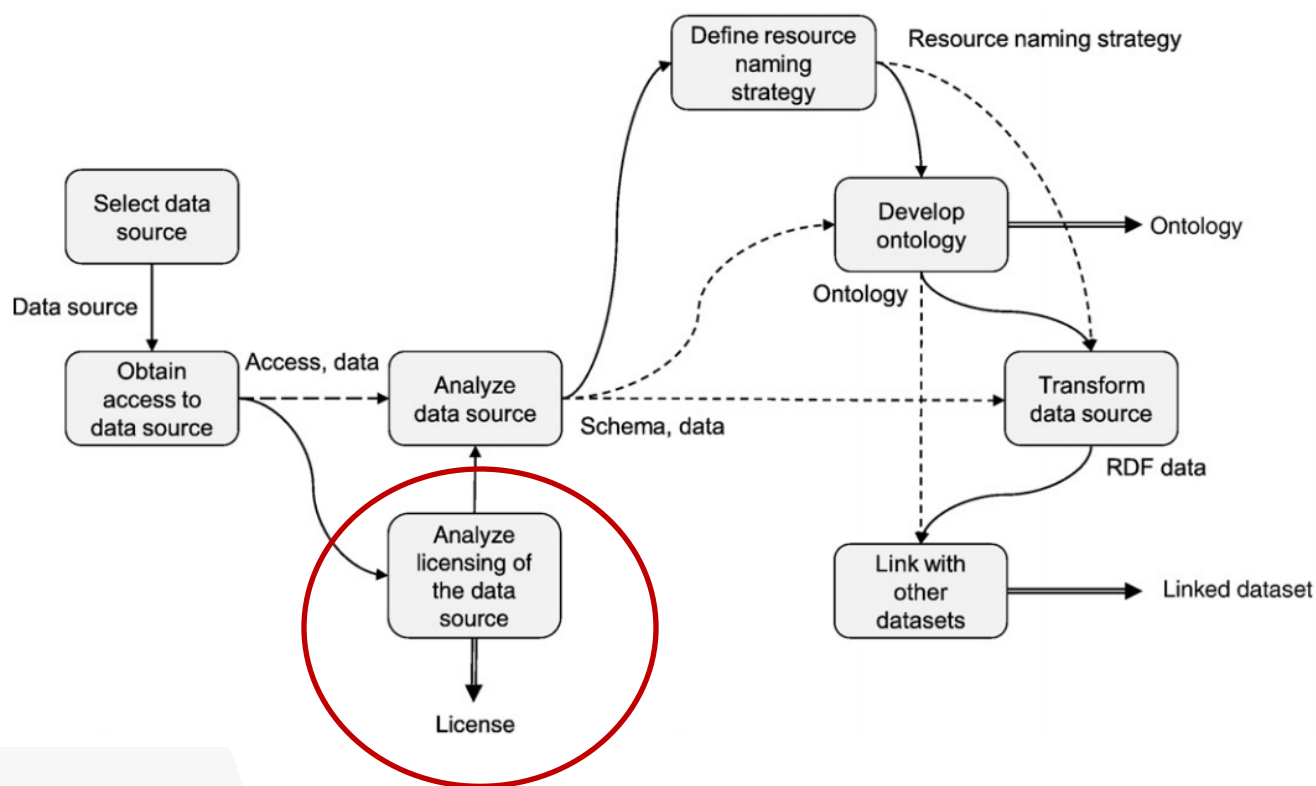

Licensed Linked Data resources as building blocks

In production settings, reusing without legal warranties is unacceptable. A resource that is not open cannot be republished, modified, used in a public application or anything else beyond private use.

Best practices to generate linked data

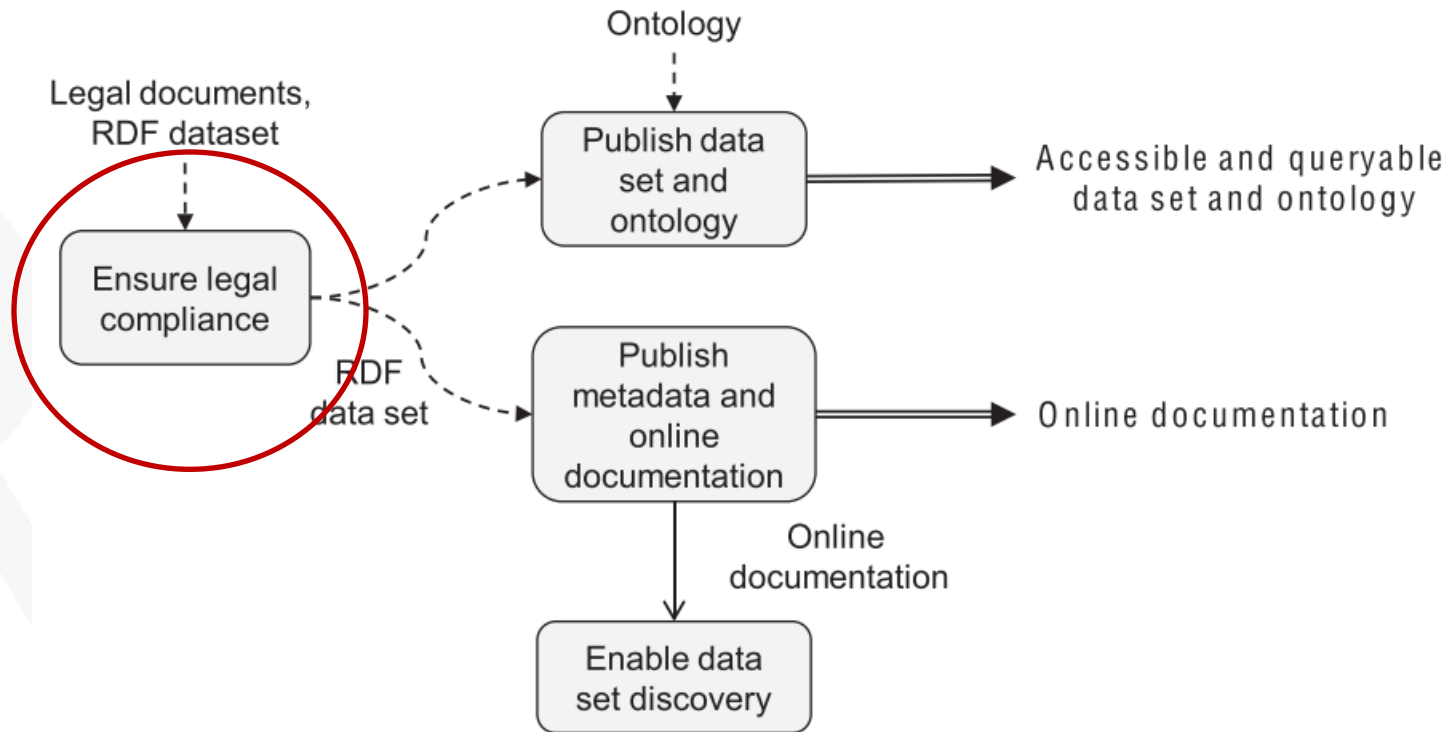

F. Radulovic, M. Poveda-Villalon, D. Vila-Suero, V. Rodriguez-Doncel, R. Garcia Castro, A. Gomez-Perez. **Guidelines for Linked Data Generation and Publication: an Example in Building Energy Consumption.** Automation in Construction, ISSN: 0926-5805, Vol. 57, pp. 178–187, September 2015

Tasks of the Linked Data generation process

Best practices to publish linked data

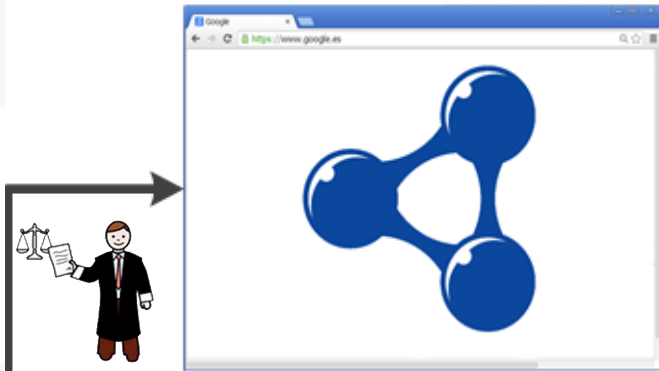

F. Radulovic, M. Poveda-Villalon, D. Vila-Suero, V. Rodriguez-Doncel, R. Garcia Castro, A. Gomez-Perez. **Guidelines for Linked Data Generation and Publication: an Example in Building Energy Consumption.** Automation in Construction, ISSN: 0926-5805, Vol. 57, pp. 178–187, September 2015

Tasks of the Linked Data publication process

How to protect your valuable data

Licenses

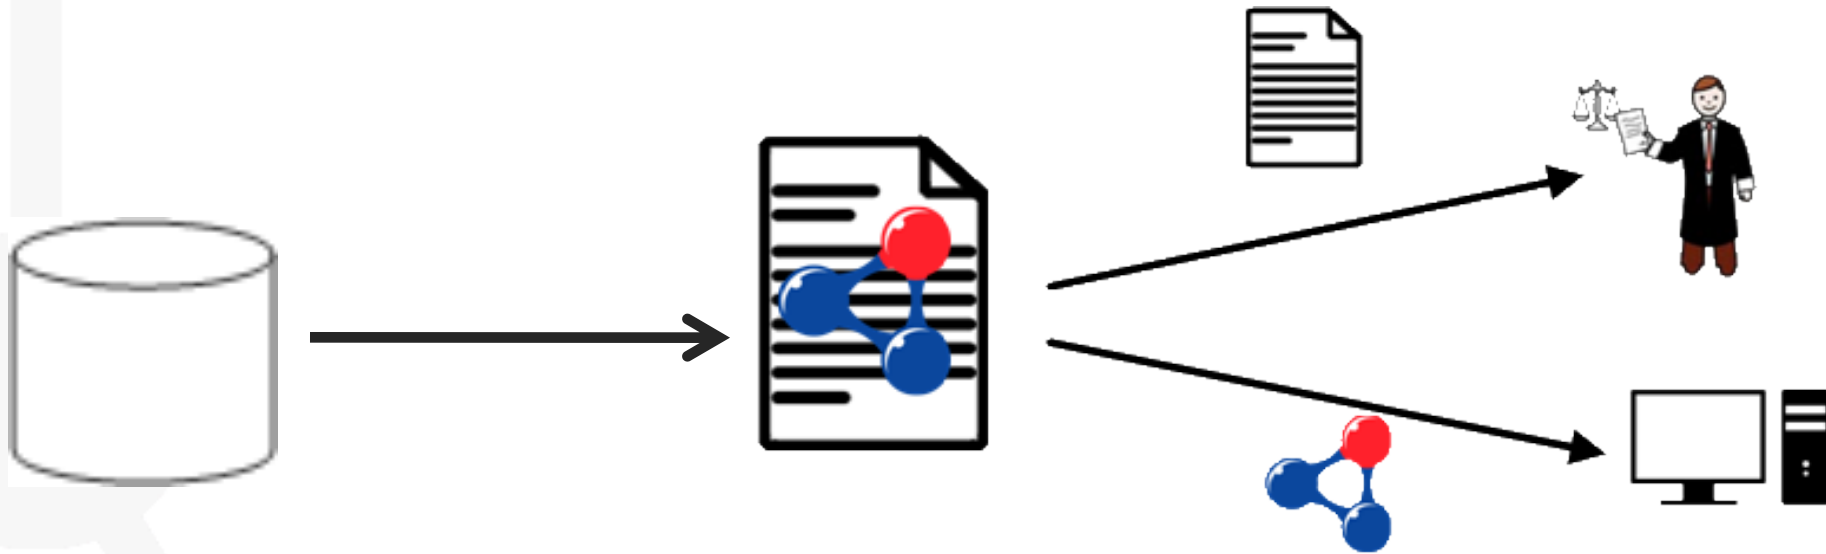

Both licenses and policies can be expressed in a digital form with a policy language like ODRL (Open Digital Rights Language)

Policies

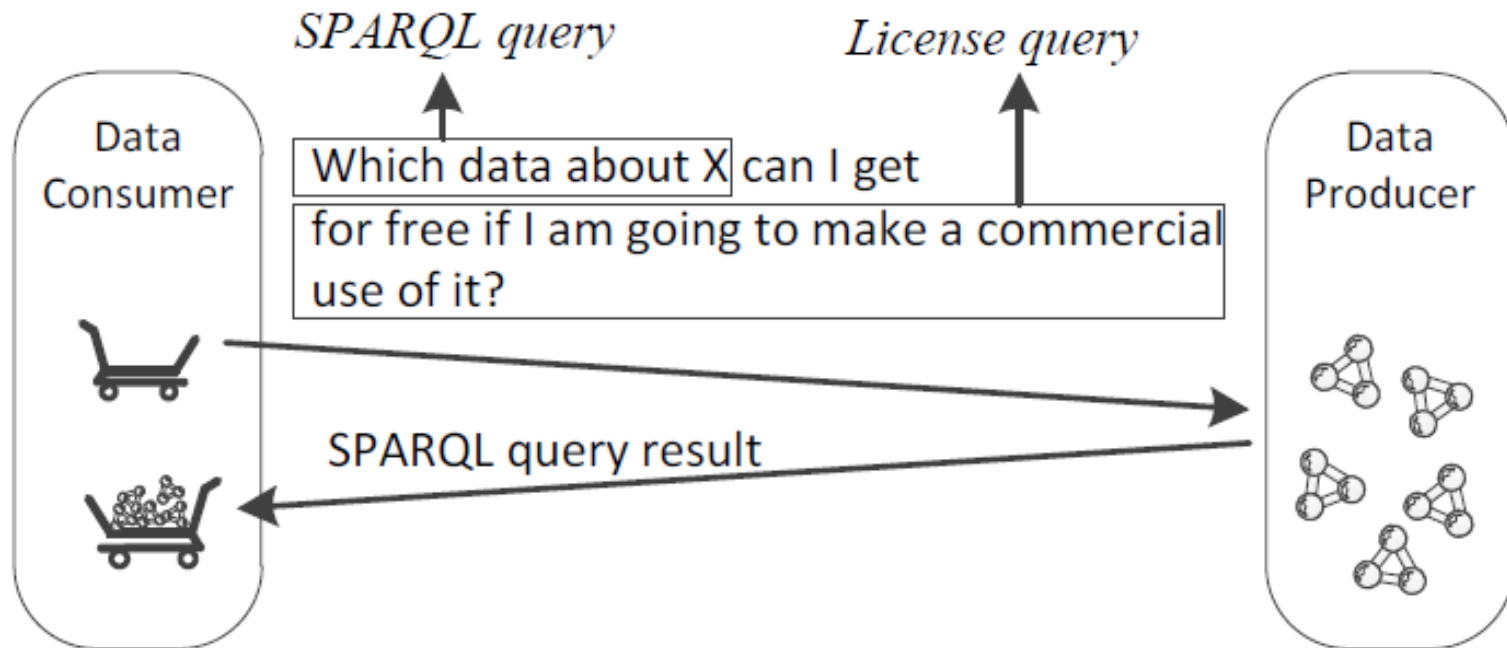

Rights expression with ODRL:
Who [can|cannot|must] act what in which resource how

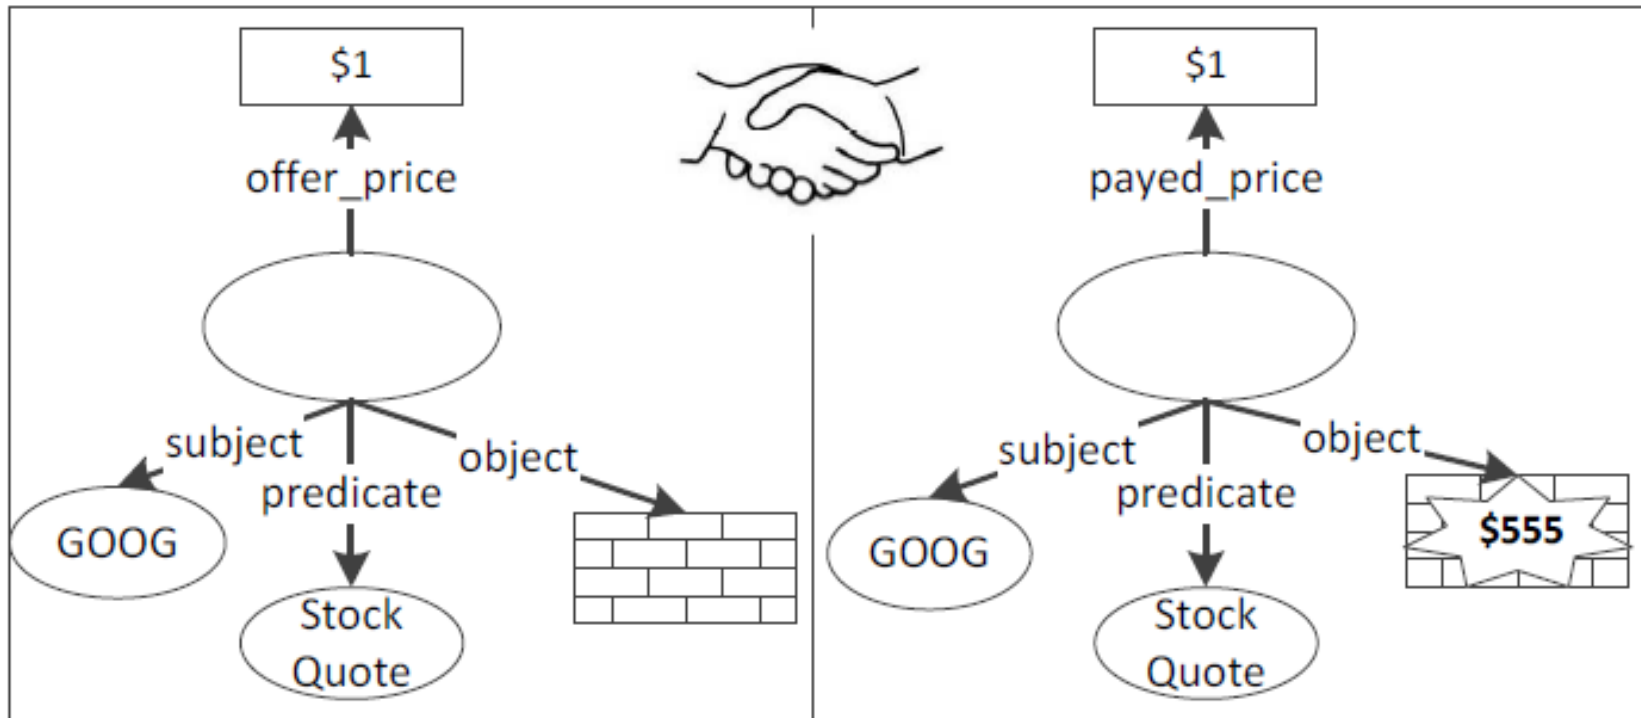

V. Rodríguez-Doncel, S. Villata, A. Gómez-Pérez, **A Dataset of RDF Licenses**, in Proc. of the 27th Int. Conf. on Legal Knowledge and Information System R. Hoekstra (Ed.), ISBN 978-1-61499-467-1, pp. 187-189, IOS Press, (2014)

How can I know what I am retrieving in a query?

Offer of Linked Data for sale

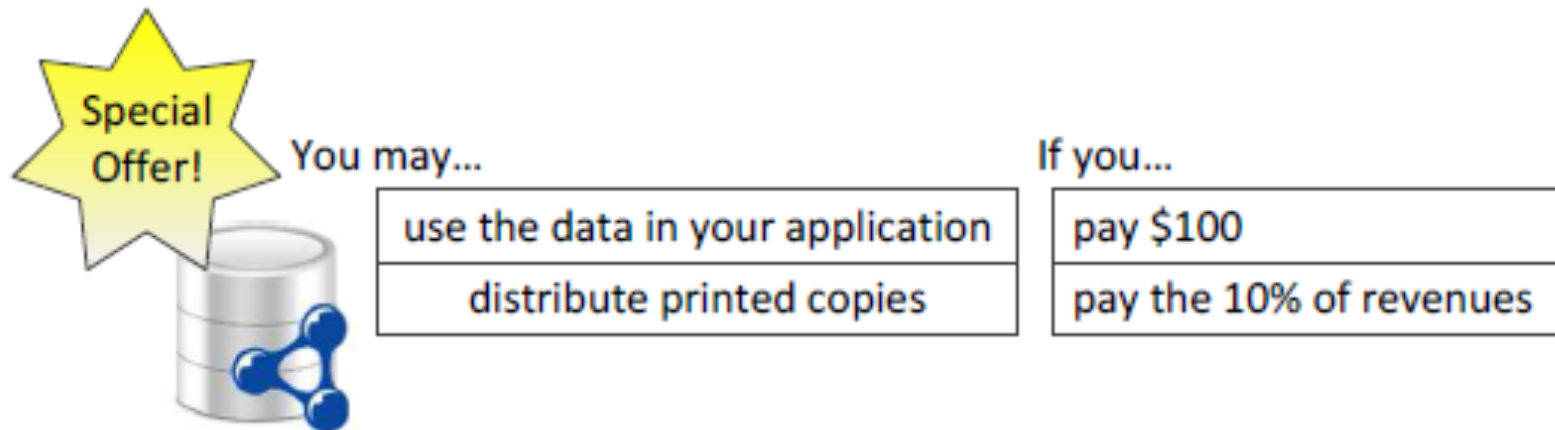

META-SHARE NonCommercial NoRedistribution NoDerivatives For-a-Fee Licence
